

# ALF 11

## ALF 11

A small non adjustable glide manufactured from a special nylon compound to give excellent abrasive and impact resistance . Alf 11 was especially designed for outdoor aluminium chairs, tables and recliners .

Fitting of ALF 11 is achieved by simply drilling a 6.1 mm hole 12 mm deep into the Material. This hole is to be drilled with a drilling jig or fixture to ensure the hole is at 90 degrees with the base. The hole is to be cleaned of all burrs before fitting. The glide is then fitted by tapping it lightly into the drilled hole with a small hammer.

Body diameter	Body Thickness	Stem diameter	Stem length	Hole size
19.2 mm	5.0 mm	6.1 mm	9.0 mm	Ø6.1 x 12 mm
