

ALF 42

ALF 42

A round base to be used as a means of attaching leveling feet and swivel castors to furniture. A threaded nut inserted during the moulding process ensures a smooth thread for adjusting applications. The unique round shape of ALF42 means quick assembly in production lines as the component is self aligning. ALF42 is secure through a 20mm hole with 4 no.4x16 chipboard screws. For assembly of swivel castors a suitable size washer should be used. ALF42 can be used in conjunction with ALF15, ALF20 or any other suitable slotted lever in our catalog. ALF44 is a unique cap which aids in finishing off the hole left inside the furniture.

<u>MODEL No.</u>	<u>THREAD</u>	<u>Ø</u>
ALF42-8	M8	52 mm

TECHNICAL DETAILS:

MATERIAL:	Polypropylene (zinc plated nut)
COLOUR:	Black standard . Custom colors consult factory.
